

ACTIVE SHOOTER

Just as any business faces for the impact of natural disasters, mechanical failures, fire or other unforeseen hazards, companies and organizations must prepare for the very real threat of violence in the workplace. Preparation in the event of an armed assault at a place of work is an essential element of employee safety.

Join us for a presentation by **Captain Tom Stroup** of the Orange County Sheriff's Office's SWAT team, for his presentation on how local law enforcement responds to an incident related to the presence of an active shooter in a place of work.
